

# Environmental Sustainability Policy

## Introduction

Claphams Landscape Services Limited are committed to achieving an exceptional sustainable environmental performance throughout its Organisation, and with this in view, the Company has an Environmental Management System which complies with the requirements of ISO 14001:2004 for setting and reviewing challenging sustainable environmental objectives and targets through management programmes.

Although environmental impacts are expected during the day to day operations of the Company, we recognise that it is our responsibility to achieve a high standard of environmental performance through managing environmental impacts within the high profile business of sustainable landscape gardening.

Claphams therefore have a commitment to the following:

## Policy Objectives:-

- Compliance with the applicable legal requirements and other requirements to which the Company subscribes which relate to its environmental aspects.
- Continually improve our environmental, health & safety performance.
- Educate and influence our employees on matters relating to the environment and the contents of our Environmental Management Systems.
- Minimising the amount of energy used and waste produced in the course of our activities.
- Give due regard to the safe disposal of waste products.
- Give a high level of importance to the recycling of waste.
- Consider all practical measures to prevent pollution.
- Efficiently use materials and products to reduce emissions and waste; i.e. use of low pollution materials and consumables.
- All materials are sourced from a responsible and sustainable source and certification should be obtained to support this.
- When sourcing manufactured materials (as opposed to natural ones) they are to be obtained from companies whose raw materials and processes are sustainable.
- All aspects of sustainability are to be considered including delivery distances and method of transport
- Materials that are not sustainable or whose methods of extraction are environmentally harmful will to be avoided. (e.g. Peat)
